

MCSA 2003: Microsoft Certified Systems Administrator

The new Microsoft Certified Systems Administrator (MCSA) on Microsoft Windows 2003 computer networking credential will advance your career by ensuring you have the skills to successfully manage and troubleshoot system environments running on the Windows 2003 operating system. The MCSA credential proves that you have the skills to successfully implement, manage, and troubleshoot the ongoing needs of a Microsoft 2003 based platform, including Programming with Microsoft SQL Server. To ensure the highest quality of education, Camden County College students are provided extensive hands-on experience, quality textbooks and simulated testing software. 18 CEU's
