

Web Design

Adobe Flash CS4 Design and Development I & II

This course is aimed at designers who want to take advantage of the power of Adobe Flash to deliver modern animated web sites. Flash is the most advanced authoring environment for creating rich, interactive content for digital, web, and mobile platforms. Create interactive websites, rich media advertisements, instructional media, engaging presentations, games, and more.

Flash Design

Provides an introduction to the application interface, visual design, motion graphics, optimization and publishing output. Topics covered include creating graphics, working with text, creating button and movie clips, creating animations, working with behaviors for interactivity, adding sound, creating forms, and basic ActionScript.

Flash Development

Create more advanced and dynamic Flash applications by integrating ActionScript and using some of Flash's more advanced features. Topics covered include formatting dynamically loaded text using HTML, CSS, and nested images, creating an ActionScript-driven menu, building advanced preloaders, working with audio/video controls, dynamic slideshows, and forms.

ActionScript 3.0

Explores creating sophisticated scalable Flash applications using ActionScript 3.0. Topics covered include major differences with previous versions, working with datatypes, classes, inheritance, interfaces, and packages, handling exceptions, and working within the OOP Application Framework

Hours: 60 each class
Course #: CE.CPG 201 / CE.CPG 202
Total Cost: \$1099 (Tuition \$354, Lab Fees \$615, Books \$130) each class

Adobe CS4 Web Design and Development

This course is aimed at people who want to learn to design static and dynamic web pages using the premiere authoring tools Adobe Dreamweaver, Photoshop and Image Ready.

Introduction to HTML

Provides an introduction to the code that drives all web pages. Topics included cover understanding web page structure, HTML tags and attributes, formatting text, adding links, graphics, tables and forms.

Web Design

Learn web design fundamentals to create comprehensive web sites. Topics covered include creating web graphics, rollovers and animations, managing web sites, using Dreamweaver's design view to manipulate text, images, links, tables, layers and forms, understanding CSS, and using behaviors for client-side Javascript.

Web Development

Automate repetitive tasks and create database-driven dynamic web sites without having to learn programming! Topics covered include using templates and library items, constructing simple SQL databases to manage content, connecting to data sources, utilizing recordsets, dynamic text, repeated regions, and creating dynamic forms.

Hours: 80
Course #: CE.CPG 102
Total Cost: \$1,699 (Tuition \$699, Lab Fees \$870, Books \$130)
