

Autodesk®

AutoCAD Level[®] 1

Introduction to 2-D Design

This introductory course is recommended for new users of all AutoCAD based products. Course emphasizes fundamental 2-D drafting skills. The class is appropriate for all disciplines—architects, engineers, designers, facilities planners, drafters, technicians, and others. It is also appropriate for those who will be primarily involved in editing drawings created by others.

Topics covered will include drawing setup, units and scale, object creation and editing functions, display and zoom functions, advanced draw functions including 2D and 3D polylines, layer creation and management, text, accuracy issues including object snaps, blocks, dimensioning, and more.

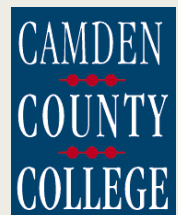

Upon completion of this course students will be able to create basic 2D drawings using the drawing and editing tools; organize drawing objects on layers; add text and basic dimensions; and prepare to plot the drawing. Students will learn essential skills in addition to more sophisticated techniques for drawing setup and productivity.

AutoCAD Designers are in demand by today's top manufacturing, design, and drafting companies. This training program prepares students for careers as draftspersons, designers, and engineers by utilizing the most widely used PC-based CAD system in the world today.

Hours: 24
Course # CE.CAD 001
Total Cost: \$599
Dates: 9/15/09 - 10/01/09
Days & Time: Tuesday and Thursdays, 6:00PM - 10:00PM
Location: Cherry Hill, Rohrer Center, Room 214

Camden County College

200 College Drive
Blackwood, NJ 08012
