Current GPA

Student Signature Date

***Social Security Number Policy:** You are required to provide your Social Security number (SSN) on the FAFSA. Provision of your Colleague Student ID or SSN (as specified on the individual document) is required on all supporting documents used to apply for financial aid. Your SSN will be used for the college's system of student records, for compliance with federal and state reporting requirements, as well as for debt collection. The college will not disclose your SSN to anyone outside the institution except as required by law, and will make every effort to protect your privacy.

STEM SCHOLARSHIP TERMS, CONDITIONS AND POLICIES

The following is a list of terms, conditions, and policies governing the STEM scholarship. This list is abridged and therefore does not, and cannot, address every circumstance that may occur. Please read both the front and back of this form. Policies governing the STEM program are subject to revision without prior notice.

STEM scholarship is a financial aid (need-based) program and as such students must comply with all applicable Federal and State financial aid policies and procedures. Students must submit all information and documents required to complete their financial aid file by the appropriate deadlines.

1. Students must maintain continuous full-time enrollment. Full-time enrollment is defined as **completing** at least twelve credits per semester. To maintain STEM eligibility students must enroll each semester in at least 12 credits.
2. Students must matriculate in an associate's degree program at Camden County College in a curricular area of science, technology, engineering or mathematics.
3. Students must enroll as a full-time student each semester. All full-time students must register for at least twelve (12) college-level credits each semester. If a student withdraws from a class and drops below 12 credits they will be given a warning letter and allowed one semester to re-take the course successfully.
4. Students are required to carry twelve (12) credits of college-level coursework. Students may register for an additional three credits of remedial coursework each semester
5. Students are required to participate in all STEM academic activities.
6. The STEM scholarship will pay the tuition and approved fees and expenses up to a maximum of \$2000 each fall and spring semester. STEM does not pay for the summer semester. Expenses may include allowances for: housing and food allowance, books, supplies, transportation.
7. The STEM academic progress policy requires that students achieve a minimum 2.75 cumulative grade point average by the conclusion of their second semester of enrollment. The policy also requires that they maintain a minimum cumulative 2.75 GPA thereafter. Students will lose their eligibility for the STEM Scholarship if they fail to maintain satisfactory academic progress in accordance with the STEM academic progress policy. The policy also suggests that students strive for a GPA of 3.0 upon graduation.
8. If a student's GPA drops below a 2.75 they will be given a warning letter and one semester to bring the GPA to a 2.75 or above.
9. If a student decides to change their major from a STEM discipline to one that is not in STEM they will be ineligible for the STEM scholarship. Consult with your faculty advisor or program coordinator before making a change.
10. Students are eligible for the STEM scholarship for a maximum of four (4) consecutive semesters as long as they continue to meet all program requirements.
11. If severe extenuating circumstances require the student to temporarily discontinue studies (i.e. medical reasons), they may appeal the grant award to extend the time to receive funding. However, in no case shall funding be made available after the spring semester 2011.
