HSR-154	Critical Issues in Developmental Disabilities	3	Prerequisite: HSR-151
TOTAL CREDITS		60	

PROGRAM DESCRIPTION

The Option program in Developmental Disabilities (DEV.AS) is designed for students who are presently working for agencies who provide services to the developmentally disabled, such as Bancroft Neuro-Health facilities, or for the student who has a desire to pursue a career working with this population. This curriculum provides and prepares students with clinical and educational skills to be able to work directly with children and adults who suffer from physical and mental disabilities, such as Autism Spectrum Disorder, Attention-Deficit/Hyperactivity Disorder, and Disruptive Behavior Disorders. Students who graduate with this associate degree may have opportunities to work in public and private schools or rehabilitation therapy centers.

PROGRAM STUDENT LEARNING OUTCOMES

- At the end of the program, the graduate will be able to:
1. Demonstrate knowledge of the federal disability laws pertaining to persons with developmental disabilities.
 2. Identify age appropriate behavior including social, educational and occupational skills, pertaining to physical and mental disabilities.
 3. Apply treatment and rehabilitation effort for individual clients based on their personal histories, developmental factors, and current medical-psychiatric condition.
 4. Demonstrate the ability to behave in professional and ethical manner.

NOTICE: Clinical placements are a required part of the curriculum and a requirement for graduation. Clinical placements may require a criminal background check, health clearance and/or drug testing before participation is allowed. Clinical sites may deny a student's participation in the event of a positive finding. Individuals who have been convicted of a felony or misdemeanor may be denied certification or licensure as a health professional. Information regarding eligibility may be obtained from the appropriate credentialing body.
