Message from the President

Welcome to Camden County College,

This has been a milestone year for Camden County College (CCC). We celebrated 50 years of student success with 50 events; one of which was our anniversary gala that raised over \$120,000 for scholarships. The work of our foundation has enabled us to award hundreds of thousands of dollars to students this year. The Foundation has also formed new partnerships with major organizations in an effort to provide larger scholarships to more students.

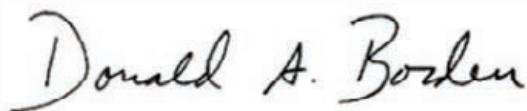

We are also proud to have received reaffirmation of accreditation from the Middle States Commission on Higher Education (MSCHE), which demonstrates confidence in the College's mission and goals along with high performance and resource management.

Strong fiscal stewardship and entrepreneurial partnerships have allowed us to respond to the changing needs of our diverse population. This year we increased transfer opportunities with four-year institutions by entering into agreements with Wilmington University, Fairleigh Dickinson University, University of the Sciences in Philadelphia, Rutgers University–Newark, and Temple University. Also, the College's premium partnership with Rutgers University–Camden was expanded.

In addition to being one of the largest community colleges in New Jersey, we are also proud to announce that we maintain the lowest tuition rates in the state. In spite of the low cost of instruction, we continue to support student success with quality programs and services, which have expanded significantly this year. Our Guided Pathways to Success student support model places students on a highly-structured academic pathway with advisement support systems to ensure timely degree attainment. Through this initiative, CCC is committed to enabling a successful academic journey leading to gainful employment or transfer to a four-year institution, and we look forward to growing this in 2019.

I am proud to serve as president of one of the premier educational institutions in New Jersey, and am committed to leading the organization in a manner that maintains accessible, affordable, and successful completion for our students.

Come "Dream. Learn. Prosper." with us.

Donald A. Borden
President, Camden County College

Who We Serve

According to a recent *Forbes* magazine article, artificial intelligence is replacing jobs that were once considered lucrative and secure. By the year 2035, “chatbots”—online, automated customer service programs—will replace jobs such as web designer, online marketer, office manager, and accountant, as well as HR professionals, journalists, editors, lawyers, doctors, and psychologists. This changes the way institutions of education look at programs and build partnerships.

If a job can be defined through a step-by-step recipe, it can be replaced by robotics or artificial intelligence. We continue to see a decline in labor jobs and an increasing demand for training in computers and lasers. The College is changing and adapting to this by adding programs in areas such as cybersecurity, retail management, and advanced manufacturing.

As educators, we are committed to providing students with the skills they need to enter this new economy. That is why we offer the most industry-recognized certifications and credentials of any other community college in South Jersey.

In fact, we confer more certificates than every community college in the state except for one. In 2015-2016, we awarded 401 certificates compared to Union County College (85), Hudson County Community College (6), Essex County College (48), and Atlantic Cape Community College (25).

Camden County College serves approximately 10,500 students annually, with 70% living in the county and about 9% coming to us from Gloucester County, 5% from Burlington County, and the rest from other counties, states, and countries.

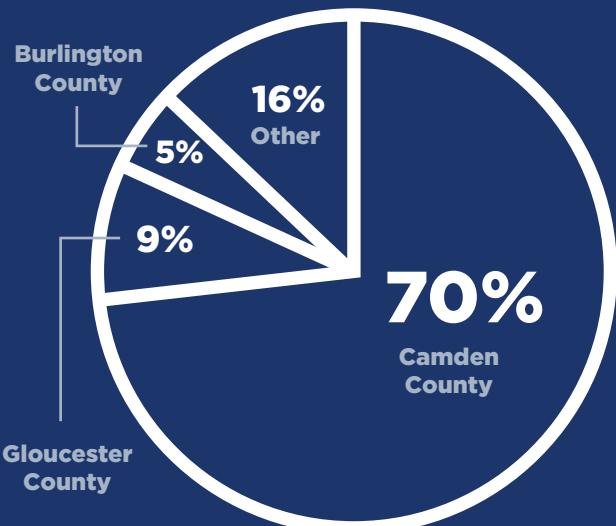

The majority of our students are female (60%), and our population is 46% white, 20% African-American, 17% Hispanic, 6% Asian, and approximately 10% other.

In addition, CCC offers the lowest tuition of any school in New Jersey. This affordability and commitment to supporting our students explains our ranking third among community colleges in the state for degrees offered. Community colleges provide students the opportunity to receive an education they would otherwise be unable to afford. Last year alone, over \$18 million in grant aid was awarded to our students.

The Camden County College motto is “Dream. Learn. Prosper.” Students set out on their educational journeys with career or life goals and are able to gather the skills and contacts required to excel in their chosen field. Those who choose Camden County College prosper because they selected an affordable education at a school with a proven track record for employment upon graduation.

Academic News

Camden County College provides high-quality education and academic excellence. Our professors, who are experts in their fields, chose to teach because they have a passion for their subject matter. We offer a variety of subjects including math, science, health, business, computers, technical studies, arts, humanities, social sciences, and more. Our professors provide student-centered instruction and participate in co-curricular opportunities, while also supporting initiatives such as transfer, advisement, and student engagement. Camden County College is proud to have reaffirmed accreditation by the Middle States Commission on Higher Education in June 2018.

We provide options for students to create a career ladder. Some may choose to earn a certificate and enter the workforce after just 24 credits. Those 24 credits can then easily fit into a 60-credit associate degree program, which can seamlessly transfer to any four-year university. Additionally, through our premium partnerships with Rutgers University and Wilmington University, students can now earn bachelor's degrees right on our Blackwood and Camden campuses.

New Partnership with Wilmington University

Camden County College teamed up with Wilmington University to bring residents affordable bachelor's and master's degrees from Wilmington University, and you can take the classes right on our campuses in Blackwood and Camden City, NJ.

"Like WilmU, Camden County College wants to provide accessible and affordable, high-quality educational opportunities for students to seamlessly transfer to four-year degree programs that would otherwise have cost them thousands of dollars more during their first two years in college," states CCC President Donald A. Borden. "This partnership is just another example of the many opportunities available to students who choose to take advantage of both the high-quality education and the fiscal rewards offered by completing their A.A. or A.S. degrees on our campus."

"Wilmington University will serve Camden County College students and alumni with the same degree of care they have come to know from CCC, while providing strong bachelor's and master's degree completion programs. Our partnership offers students the opportunity to earn in-demand, higher-level degrees without leaving the area," said Dr. LaVerne Harmon, President of Wilmington University.

New Retail Management Certificate

This one-year certificate (10 courses) provides students with specialized course work in retailing. The course work is available in face-to-face classes, hybrid courses (some online, some in-class), and fully online. This program is designed as a pathway to obtain associate degree credentials in the discipline of retail management. Upon completion, students can continue to pursue a degree in one of many different business degrees.

Retailing offers careers in such areas as selling, sales management, buying advertising, and display. It is an ever-changing field that allows much opportunity for innovation; particularly in the day and age of e-commerce sales. There are options for a student to run a privately-owned business or work for a larger organization. Retail buyers study market research reports and monitor sales transactions to determine which products are in demand. They assess resale value of goods and make purchases. These are skills that are growing in demand, and CCC is ready to meet this demand with qualified employees.

This program, endorsed by the Western Association of Food Chains and the Food Marketing Institute, is relevant in any retail sector. Its curriculum and learning outcomes mirror those advocated by the National Retail Federation.

New Cybersecurity Degree

The Cybersecurity Program is designed to provide an affordable path toward a career in the fast-growing cybersecurity field. The curriculum is built for both established professionals and those just starting out in an IT career. The CYB.AAS program is intended for students who want to enter a career directly after graduating and those who plan on transferring to a four-year college.

Students are encouraged to prepare for CompTIA certification exams, like Network+ and Security+, as well as Cisco CCENT certification.

The Cybersecurity Associate in Applied Science degree prepares students for employment in the field of information security. Major areas of study include network fundamentals, operating systems, network defense, and computer forensics. The courses in this degree combine theory and application in order to develop and implement appropriate information, security policies, and procedures.

Student Support Programs

Through the College Division of Enrollment and Student Services, CCC is committed to providing comprehensive academic support programs and services to all students. We strive to meet student needs, ensuring both opportunities for successful learning and academic excellence.

Career Services

Career Services helps currently enrolled students, as well as alumni, with developing, evaluating, and implementing career and employment search strategies. These services include: market projections, résumé writing, mock interviews, internship / career seeking, and recruitment opportunities that will assist new job seekers as well as those returning to the workforce. Career Services is committed to providing students with current, comprehensive information along with the skills and techniques necessary to thrive in any job market.

Transfer Services

Students at CCC can customize their program of study to best meet their academic goals. Our advisors assist students in selecting courses that meet the graduation requirements at CCC, while also achieving the maximum number of transfer credits. With an increase in advising staff, we encourage all students to discuss transfer plans with an advisor early in the process.

Emergency Book Fund

Since Fall 2016, the Barnes & Noble Emergency Book Fund has helped 153 students with over \$36,459 in emergency textbooks. Administered through the Student Services Division, this collaborative effort has benefited students who do not have the money to pay for their textbooks. Textbooks are also available in the library, or can be purchased depending on the student's needs. Faculty, administration, and staff can refer students to the program, which has become a great tool for retention and student success.

MarketPlace

The Camden County College Food Pantry, called the MarketPlace, began operating in the Fall 2018 semester. The Office of Student Life and Activities manages the pantry with support from the CCC Student Government Association, campus administration, community partners, student body, and the college community to provide food and other essentials to students in need.

The MarketPlace will have two locations: room 200 of the College Community Center at the Blackwood Campus, and room 410 in College Hall at the Camden Campus.

Students will need to complete a registration form and present current CCC ID in order to use the food pantry services.

Donation of basic food needs are always welcome, and volunteer opportunities are available upon request.

Disability Services

Disability Services is an umbrella of services available at Camden County College including the Office of Disability Services, Program for Students who are Deaf and Hard of Hearing, and Garden State Pathways.

The Office of Disability Services provides academic support to students who have documented disabilities. The Americans with Disabilities Act (ADA) defines disability as any physical or mental impairment that substantially limits one or more major life activities such as: caring for oneself, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning or working.

The Office of Disability Services strives to create an environment that recognizes differences and builds both self-advocacy and independence. Students who may be eligible for services must self-identify to the Office of Disability Services. Services provided include: academic advisement / coaching, academic accommodations, assistive technology, and summer orientation.

Dear Alumni, Friends, and Donors,

It is hard to believe that we are closing in on 2019. As we reflect on last year's accomplishments on the pages that follow, you will see just how large of an impact the Camden County College Foundation has had on the college community. Our 50th anniversary proved to be an incredible year. The Foundation hosted the 50th Anniversary Gala, its largest and most successful fundraiser yet, and awarded approximately \$220,000 in scholarships and provided about \$100,000 in funding for various programs. I want to thank you for your enthusiasm and participation along our journey.

We have much planned for the coming year. We will continue to increase our support for students and our academic programs, while providing more opportunities to reconnect with our alumni.

On behalf of the Foundation, please accept my thanks for your confidence in our mission and for your enduring support of our efforts.

Sincerely,

John R. Dillon

Rohrer Foundation Pledges \$300,000 to Camden County College Students

The William G. Rohrer Charitable Foundation has donated and pledged a total of \$700,000 to Camden County College students since 2012, including its most recent pledge of \$300,000 to be paid out over the next five years. Since its inception, the William G. Rohrer Scholarship Program at CCC has awarded scholarships to approximately 240 students. Scholarships are awarded annually to high school graduates entering CCC for the first time, and to CCC graduates transferring to a four-year university. Rohrer scholars were recently honored at a luncheon with Linda Rohrer, Trustee of the Rohrer Foundation.

Meet Elizabeth Doan (20)

A double major in education and foreign languages, Elizabeth wants to transfer to Rowan and major in musical education so she can travel the world and teach music. She chose CCC because she was a NJ STARS recipient, and it was close to home. But once here, Elizabeth realized, "It's so sophisticated. There's so much going on and it's such a vibrant campus with so many different programs." She is thankful to Linda Rohrer and the Rohrer Foundation. "Thank you so much to Linda Rohrer. This isn't the first scholarship I received from her. I'm so honored that her foundation supported me as an incoming CCC student and now a transfer student."

Meet Kojo Abanyie (18)

A pharmacy student transferring to Rutgers this year, Kojo is a member of the Chemistry Club and Phi Theta Kappa. Kojo started as a dual credit student, which made it easy for him to get his high school diploma and college credits at the same time. "There are a lot of professors here that work at other institutions of higher learning," which means he is getting the same education someone else is paying much more to obtain. Kojo wants the Rohrer Foundation to know that he is thankful for the recognition of his hard work. He promises to continue to work hard in the future. Kojo believes donating to a scholarship fund "is a good thing to do because it not only helps with someone's money situation, but also gives them encouragement to continue to do well."

Meet Kristin Burke (37)

An elementary education major transferring to Stockton to major in liberal studies, Kristin wants to become a middle school teacher. She is a member of Phi Theta Kappa and is secretary for Kappa Delta Pi. Kristin remembers, "I had a job that I hated and had to drive past the College to get there. One day I decided, I'm going to apply to this college and change my life. And I did. And I don't regret it." She wants her donor to know, "It's a wonderful thing that you're doing and it's changing peoples' lives. It's changing future generations as well. My children are watching me work hard and my students are going to know that I got scholarships. I plan on telling everybody about how CCC did this for me and you don't have to go hugely in debt at a four-year university right away. It's affordable and workable, and the scholarship really is changing lives."

It's affordable and workable, and the scholarship really is changing lives.

240

Rohrer scholarships awarded to students

\$300,000

William G. Rohrer Charitable Foundation's most recent pledge to be paid out over the next five years

Meet Ashlee Dever (32)

A nursing major who will continue her studies here in Blackwood as a Rutgers University nursing student, Ashlee decided to attend CCC because of the convenience. "I took morning classes, afternoon classes, weekend classes, online classes. It was just totally flexible. It was easy to fit it in my schedule." She wants her donor to know that her Rohrer scholarship "really did make a huge difference and helped make it possible for me to go on and get a four-year degree."

Meet Mia Sanchez (20)

A business administration student at CCC transferring to Rutgers-Camden to earn her bachelor's degree, Mia also has been an intern at the US embassy in Azerbaijan. She currently works at The Center and is an executive board member for Phi Theta Kappa. Regarding her scholarship, Mia wants her donor to know: "This scholarship made my future education possible and took away a lot of the financial burden placed on me." She believes, "People who are capable should invest in students like me, so we can focus on school without having to worry about money."

Meet Khyia Ward (20)

A psychology student transferring to Rutgers-Camden, Khyia is a member of Phi Theta Kappa and was also recently voted Alumna Trustee, which allows her to sit on the College Board of Trustees for one year. Khyia believes, "The teachers were very supportive of me and other students. Everybody was trying to work together to get a degree and move you on to the next step. There's just a really good support system here at Camden County College." She wants her donor to know, "Thank you so much. You have no idea how this impacts a person's life. This is going to help me pay for things that I wasn't sure of before."

**There's just a
really good
support system
here at Camden
County College.**

50th Anniversary Gala Raises \$125,000 for Student Scholarships

On April 13, Camden County College hosted its 50th Anniversary Gala with nearly 450 people in attendance. The black tie-optional event raised \$125,000 for student scholarships and featured entertainment by Britishmania and CMR Entertainment, catering by Sodexo, floral displays by Michael Bruce Florist, and lighting design by Starlite Productions. Rutgers University–Camden served as the exclusive presenting sponsor, with silver sponsorships provided by Advanced Enviro Systems, Cooper University Healthcare, Barnes & Noble Booksellers, Joseph A. Maressa Golf Tournament, and Republic Bank Bronze sponsorships provided by Atlantic City Electric, Conner Strong & Buckelew, Bowman & Company LLP, Camden County Improvement Authority, Firestone Complete Auto Care, Jefferson Health System, Michael Bruce Florist, Rowan University / Rutgers–Camden Board of Governors, Spark Creative, Visit South Jersey, and Wilmington University.

The event celebrated 50 years of impact at CCC, and more than 100 professors were honored along with groups of alumni and other community leaders. Those chosen had previously received one of the following College awards: a Teaching Excellence Award, the Civic Leadership Award, or the Outstanding Alumnus Award. Three new awards were presented at this event.

The Camden County College Presidential Impact Award was awarded to US Representative, Donald Norcross, for making an impact on a national level. Congressman Norcross had also previously received the Outstanding Alumnus Award and the Civic Leadership Award. Cooper's Ferry Partnership CEO, Kris Kolluri, received the Riletta Cream Impact Award for Civic Leadership, and retired College trustee and former VP of The University of Delaware, Maxine Colm, received the Otto and Leah Mauke Impact Award for Education.

Faculty, staff, alumni, elected officials, and friends of the College enjoyed an amazing night with dancing, delicious food, a photobooth, and silent auction.

Why I Give: Deborah DiGiacobbe, Lenora DiGiacobbe Memorial Scholarship

How long have you been a donor to the CCC Foundation?

This coming spring will mark the tenth year I have had the privilege of giving to the Camden County College Foundation.

What made you start giving back?

This gift is given in memory of my mom, Lenora DiGiacobbe. My mom worked at the college book store. She enjoyed helping students purchase everything they needed for the semester. Aware of their financial challenges, she did her best to assist them. When my mom passed away, I was excited to learn of the opportunity to continue helping students through a book scholarship.

Why do you continue to give back?

Over the past nine years, I have met many amazing recipients. I have listened to their stories, their dreams, their determination and challenges. I learned that for many, they could not get the education they needed to pursue the career they dreamed of without financial assistance.

If you could say something to someone who was considering making a gift to the CCC Foundation, what would it be?

As a proud alum, I am extremely grateful for the stellar education I received at Camden County College. I am thankful for the opportunity through the Foundation, to be able to give back. I know that my small gift will help many to obtain the outstanding education that I have gotten at Camden County College.

Why I Give: Dr. Catherine Boos, CCC Dental Programs Endowed Scholarship Fund

How long have you been employed at CCC?

I have worked at CCC for 30 years.

How long have you been a donor to the CCC Foundation?

It's been at least 20 years.

What made you start giving back?

I have had a very rewarding career here at CCC and wanted to give back in a way that would help students financially.

Why do you continue to give back?

I see how some students who are trying to better themselves struggle financially while going to school. Some students have full-time jobs while in a full-time dental auxiliary program. I have had students work all night and then start their day here at CCC at 8 in the morning. I have had students who couldn't afford books or food. I want to do whatever I can to try to alleviate some of the financial stress involved in a full-time program such as a dental program.

Education is important in allowing someone to be a contributing member of society. A student who completes a dental auxiliary program will be a person who can have a satisfying career while providing dental care to patients.

Why did you make the decision to make a planned gift in your estate?

I can think of no better legacy than to continue to help the next generation get an education in the dental field.

If you could say something to someone who was considering making a gift to the CCC Foundation, what would it be?

It gives one great satisfaction to know that a gift to the CCC Foundation can ultimately make an impact in someone's life.

It gives one great satisfaction to know that a gift to the CCC Foundation can ultimately make an impact in someone's life.

Ammon Foundation and Camden County College Foundation Partner to Provide Opportunities to Students in Recovery

The Ammon Foundation, launched in October 2016, is a foundation established to empower individuals in addiction recovery by combating stigma and providing strategic support to enable personal success. In June of 2018, the Ammon Foundation and the Camden County College Foundation began a partnership to provide scholarships to students in addiction recovery. The program will provide a matching scholarship from both Ammon and CCC, of up to \$2,000 (\$1,000 from each foundation) each year. The program seeks to provide support for students in recovery and also help them through the education process to ensure their success. "We are grateful to the Ammon Foundation for reaching out to us and becoming our partner in this project," says LeRoy Stanford, director of the Addictions Counseling program at CCC. "This is a great opportunity for potential students who are starting over and need the financial support to begin a new educational career at CCC."

Matching scholarship from both Ammon and CCC of up to

\$2,000

\$1,000 from each foundation, each year

Scholarship Spotlight: Kaitlin McGee, English Major, Mauke Scholarship Recipient

Kaitlin is an English major who will graduate from CCC in December 2018. She plans to transfer to a four-year university to pursue a bachelor's degree in English, and eventually a master's degree to achieve her goal of becoming a college professor. Raised in a single parent household, Kaitlin has been working to pay for her college tuition and was overwhelmed with the thought of being able to do so and additionally pay for her bachelor's degree after graduation. "When I found out I was awarded a scholarship I was very excited and grateful. I had been trying to save up for transferring, so receiving a scholarship to provide funding for my tuition at CCC relieved the financial burden of going to school. I was ecstatic I was chosen and I am so grateful that there are people out there who are generous and care about students. Because of Mrs. Mauke's generosity and compassion, I am able to go to school and focus solely on doing well," says Kaitlin. "I am extremely thankful and appreciative of her kindness." When asked what her response would be to someone considering establishing a scholarship at CCC, Kaitlin said, "Your donation makes it possible for students of all backgrounds and circumstances to attend school and continue their education. Not only does it allow students to attend school, but it also allows them to focus on their studies instead of worrying about money or picking up extra hours to pay for their books. The gratitude from students and the knowledge that you helped shape the life of someone else is worth the sacrifice," she says.

“Because of Mrs. Mauke’s generosity and compassion, I am able to go to school and focus solely on doing well.”

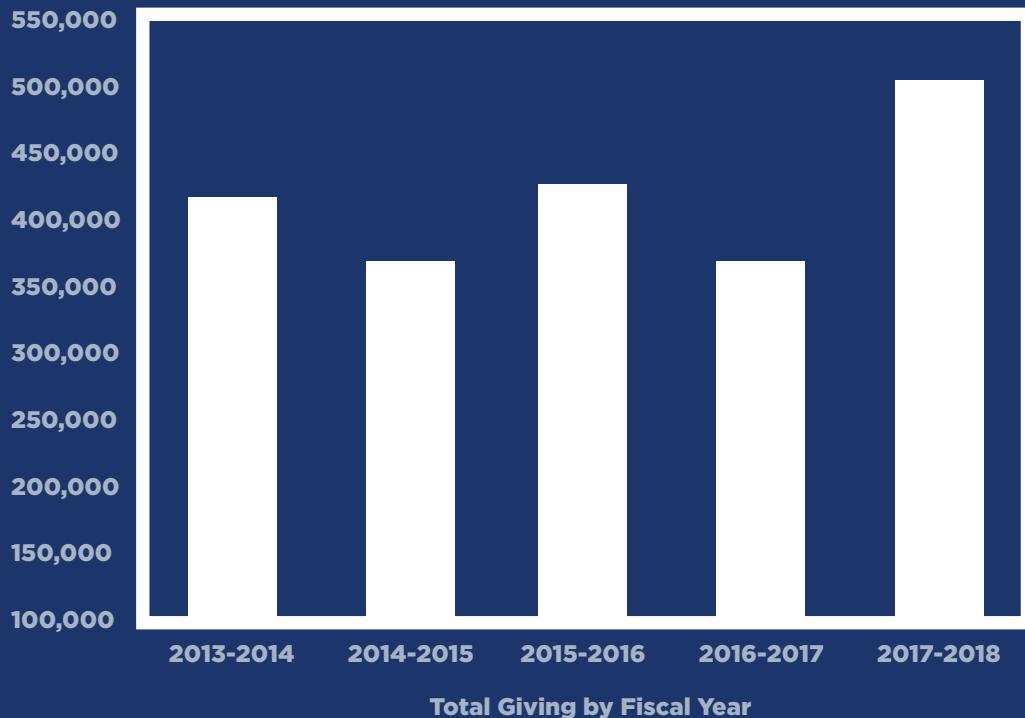

This is the gift of a lifetime and can be the make or break factor in someone continuing their education, which affects the rest of their life. You won't regret it.

Scholarship Spotlight: Christian Benitez, Dental Hygiene Major, Lamar Ortiz Scholarship

Christian Benitez is a Dental Hygiene major who plans to graduate from CCC in 2019. Following graduation, Christian will begin his career as a dental hygienist, while simultaneously pursuing his bachelor's degree online. Christian struggled with being able to focus on his studies, while also supporting himself when he can as a driver with Uber and Lyft. "The dental hygiene program is full-time and very demanding. This leaves little time for a job to have any kind of income. The program requires us to purchase over \$2500 worth of dental equipment and supplies throughout the duration of it. These additional costs on top of the traditional expenses of college such as tuitions, fees, and textbooks, make scholarship opportunities that much more special to those of us who are enrolled," says Christian. When notified of his scholarship, he was shocked and excited, and beyond grateful. When asked what he would say to someone who is considering establishing a scholarship, he said, "This is the gift of a lifetime and can be the make or break factor in someone continuing their education, which affects the rest of their life. You won't regret it."

Women's Cross Country

Student Activities

Studies show that students who are engaged in extra-curricular activities in college have greater opportunities for networking, career growth, building friendships, enhancing academic and leadership development, and overall student success.

Our student clubs bring theory into practice and allow our students to connect with industry professionals, professors, and fellow students. We offer students opportunities outside of the classroom to help them grow as people and expand their experience through programs, activities, athletic / intramural offerings, special events, and student groups. This provides a well-rounded college experience.

Clubs at the College

19

	Addictions Counseling Club		Engineering Society
	American Sign Language Club		Game Design Guild
	Animal Care Club		Healthy Educational Advocates for Relationship Resources (HEARSS)
	Campus Press Newspaper		MAD LIT - The Madison Literary Society of Camden County College

	CRU (Crusade for Christ)		W.E. Women Empowered
	Dental Assisting Club Dental Hygiene Club		World Culture Club
	Dietetic Club		

500+

students participate each year in student clubs and organizations

Arts & Culture

Arts on Campus is an initiative started in 2014 with the intention of showcasing the wealth of artwork currently in the Camden County College collection. Recently the agenda has expanded to actively solicit work on loan and donations from regionally and nationally recognized artists. We currently have over 50 works of art on campus and we continue to expand. The College is becoming a destination for art appreciation, with tours led by Foundation Board Member Joe Haro. If you have artwork to donate, please visit our website camdencc.edu/arts-culture/art-on-campus.

Camden County Cultural and Heritage Commission at Camden County College

The Camden County Cultural and Heritage Commission at Camden County College, the designated agency in Camden County to receive and administer grants from the New Jersey State Council on the Arts and the New Jersey Historical Commission, oversaw re-grants to five county history organizations and 18 county arts organizations.

In addition, the Commission sponsored programming free to the public in The Center. Programs included were a World Music Series, Visual Art Series, Readers' Theatre programs, and two lecture series. The Senior Citizens Juried Art Contest & Exhibition, sponsored by the Commission, attracted 44 original works of art from senior artists, including a 100-year-old painter and several artists in their 90s. Eighteen artists were selected to compete at the state level, and five county artists won top honors from the state.

The Center

Art in the Evening Lecture Series

Given by Monica Zimmerman, Pennsylvania Academy of the Fine Arts.

Civil War Presentation

"The Andersonville Trial" – presented by Joseph F. Wilson, whose ancestor survived the deadliest prison.

The Roaring Twenties Lecture Series

Featuring lectures by notable experts in the field:
Robert E. Chiles, Dept. of History, University of Maryland
Nelson Johnson, author of *Boardwalk Empire*
Cheryl A. Wall, Dept. of History, Rutgers University
Warren Goldstein, Dept. of History, University of Hartford
Vanessa May, Dept. of History, Seton Hall University

Mini-course

"It Happened on Broadway: Exploring the American Musical" – one of our most popular mini-courses.

Mini-course

"Social Dancing and its Relationship to Social Movements," Bill Ebert, instructor.

Mini-course

"The Tragedies of William Shakespeare," Matt Screni, instructor.

Mini-course

"Tim O'Brien and Stories from the Vietnam War" – a discussion of two books that explore the conflict and long-term effects of the war, presented by Tim O'Brien, author and Vietnam Vet.

Vanessa May

Associate Professor of History, Seton Hall University, who gave the lecture, "The Rise of the New Feminism," on October 3, 2018, as part of the 1968: The Year that Changed America series.

Stef Woods

A professor in the Department of American Studies at American University, gave the lecture, "Popular Culture in the Roaring Twenties: The Age of Excess."

Facilities Upgrades

One-Stop Student Center

Several years ago the College opened a One-Stop Student Center in Taft Hall. This created a place where students can register, pay, and enroll all in one building. The One-Stop also offers access to the international students office, advisement, financial aid, student activities, tutoring, and mentoring. This year, Enrollment Services also created a “digital One-Stop,” which is a page on the new College website that includes all the services offered on campus in a virtual format.

Shuttle

Consistent with our mission to provide a high-quality, accessible, and affordable education, the 2018 Spring semester marked the launch of our first shuttle bus. Students can take the shuttle between the Blackwood and Camden campuses at no additional cost. The new shuttle is in response to a significant need, expressed by students, to have an advantageous connection between the different campuses. It was so successful that the program is being expanded to include two shuttles.

Students are able to reduce travel time and eliminate travel cost between the campuses, which allows for greater accessibility to the array of classes held at the Blackwood and Camden campuses and can lead to faster completion of course work. The goal is to enhance student success and boost the graduation rate by adding this service.

CIM Auditorium

The College is a destination for events and activities in the county. Our CIM building houses some of our fastest-growing degree programs, including advanced manufacturing, precision machining, and computer-aided drafting and design. In order to improve the overall appearance and interior space of the CIM building, and to make it safe and beautiful, the College replaced its ceiling tiles and the auditorium's flooring. The walls were painted, and old, oversized tables were replaced with space-efficient, adjustable reference tables in an effort to provide better accessibility and usability of the space. A new up-to-date audio visual sound system was installed in order to enhance students' educational experiences and provide improved flexibility and use. The existing system consisted of basic speakers and a basic mixer, but the College updated the space to meet modern technology standards.

Wilson Hall Demolition

The Wilson complex consisted of four buildings that were constructed prior to 1967, when the College purchased the property. Many alumni may remember attending classes in Wilson East and West and registering in Wilson Center. Since the buildings and their systems were beyond their useful life and were a financial burden, the College took them out of service. All departments in these buildings were relocated. Demolition of these buildings began in May 2018 and was completed this summer. The Blackwood Campus now boasts some green space at the entry road off College Drive.

Joint Health Sciences Center

The College has been working on the development of a new joint health care facility in collaboration with Rowan University / Rutgers–Camden Board of Governors in Camden. This May, the project reached a milestone with a steel topping ceremony. The center will focus on educating and training the residents of Camden in health care. The proposed programs include surgical technology, certified nurse aide, multi-skilled technician, certified medical assistant, patient care technician, and certified medical assistant.

Optical Clinic Relocation

Recently, the College Optical Clinic moved from the Community Center to the CIM Building to expand operations. The Camden County College Optical Clinic provides second-year ophthalmic students with practical and educational experience in their quest to become licensed opticians in the state of New Jersey. At the same time, the college community has the opportunity to obtain high-quality prescription eyeglasses and prescription sunglasses at a great value.

Future Projects

Lincoln Hall and the Dennis Flyer Theater will be renovated in the summer of 2019. Improvements will be made to the theater, the classroom space, and the galleries to provide a state-of-the-art educational experience for our students. Additionally, the College recently completed a feasibility study for the Papiano Gymnasium, which will result in its complete renovation; including the classroom and public spaces.

For Your Business

The Corporate Training Institute at Camden County College is a full-service business resource center providing customized training solutions for business, government, and non-profit organizations. Our training is based on employer demand. We partner with employers by implementing customized training programs for the current workforce and providing training to the unemployed to support employer hiring demands.

Training can be contracted as fee-for-service or connected to grant funding to subsidize employee training costs. Training schedules are flexible and can be delivered on site or at any CCC campus. Our instructors are highly credentialed, industry-experienced training consultants with varied backgrounds and technical real-world experience.

New Jersey Business and Industry Association Grant

This funding, now in its 12th year, is available through a partnership between the New Jersey Business & Industry Association (NJBIA), the New Jersey Community College Consortium for Workforce and Economic Development, and the NJ Department of Labor and Workforce Development. Training programs include:

- PC Skills – Windows, Outlook, Excel, Word, PowerPoint
- Communications – Verbal & Written
- Customer Service
- Spanish in the Workplace
- English as a Second Language
- Mathematics & Measurement

We deliver courses at client sites, or any Camden County College location, with a minimum of ten students. Open enrollment classes are also scheduled for individuals to attend at the William G. Rohrer Center in Cherry Hill. In 2018, over 90 NJ employers were served in various industries. Some of our employer partners are: Amazon, Comcast, Cooper University Health Care, Holtec International, Holman Automotive Inc., Lourdes Health System, RAM Electronics, U.S. Vision, LLC., Supermarkets of Cherry Hill, and Thomas Scientifics, LLC. Altogether there was approximately an 8% increase in revenue for NJBIA training classes this fiscal year.

New Jersey Advanced Manufacturing Talent Development Center

For the second year in a row, Camden County College has been designated the Advanced Manufacturing Talent Development Center by the New Jersey Department of Labor and Workforce Development. As an integral part of the New Jersey Talent Development System, the Talent Development Center will serve as a Center of Excellence and expand the state's higher education capacity in the Advanced Manufacturing sector.

This \$1.2 million grant allowed CCC to serve as an anchor partner in the Targeted Industry Partnership of Advanced Manufacturing. This year the TDC will provide statewide:

- \$450,000 to train dislocated individuals (leading to an industry-valued credential)
- \$450,000 to train incumbent workers (leading to an industry-valued credential)
- \$100,000 to train disadvantaged (underemployed)
- \$100,000 to provide basic skills training
- \$100,000 to develop three career pathways in Advanced Manufacturing

In 2018, \$778,954 training dollars were utilized, 883 workers participated in training, and 135 employers were served.

Training programs include: CNC, Welding, Lean Manufacturing, AutoCAD, and Certified Production Technician.

For Your School District

At Camden County College, it is mission-critical to provide accessible, affordable, and high-quality educational opportunities to students. We build collaborative partnerships with local high schools, and we want to bring college credit to high school students.

“In District” contracts offered specialized training to over

200 professional staff

Our Division of School, Community, and Workforce Training Programs expands college readiness opportunities for high school students by reducing barriers to enrollment. We customize programs that work for students to get them closer to earning their college degree before they graduate high school.

Our dual credit agreements are faculty-to-faculty programs in which high school faculty members create curriculum for Advanced Placement courses, and college faculty certify those courses as college-level. Students in AP courses earn college credit for their work. The College also offers courses to high school students in the high school setting, on our campuses, and online.

In addition to providing college credit to high school students, Camden County College also supports high school faculty and administrative staff by offering professional development and other various resources. Our new School Services Center facilitates both on campus and remote professional development on current topics in education. The Learning Resource Center on our Blackwood campus allows educators, as well as parents and community members, to borrow educational resources for a yearly fee of only \$2. Finally, the New Jersey Child Assault Prevention team educates children and strengthens families so that all children can be safe, strong, and free.
